careers@nomadic-labs.com

Position

Nomadic Labs is looking for experienced Project Managers to coordinate the efforts of the R&D team and make sure projects are completed on time and within scope.

Responsibilities

- Define milestones and priorities and schedule timelines in collaboration with Engineers
- Monitor progress
- Report regularly to the team and executive management
- Help collaboration and communication between projects
- Help implement best software development practices
- Coordinate Engineer onboarding

Desired Skills & Experience

- Experience in software engineering project management
- Computer Science degree or related experience
- Strong interpersonal and communication skills
- Strong familiarity with project management methodologies, and best practices
- Bonus: interest in and knowledge of blockchains

Nomadic Labs

Located in France in Paris and Grenoble, Nomadic Labs' central activity is to contribute to the development of software at the core of the Tezos blockchain.

Our experts come from various domains of computer science including programming languages, distributed systems, formal verification and cryptography. They work in a collaborative environment with a high degree of autonomy.

We believe our strength lies in a unique mix of skills and experience, allowing us to transfer the best of academic research into real-world applications.
